

CABLE CUTTER

'KS-62'

750 sqmm / 62 mmØ

This cutter cuts even larger cables with remarkably low effort for the user. A needle beared eccenter is connected to the moving handle and provides the advance of the cutting blade. The optimized cutting geometry also helps to reduce the handle forces. This patented configuration has proven reliability since many years and is almost maintenance free. Dirt and other particles can easily be removed with the tooth comb supplied with the tool.

USAGE RANGE for example:

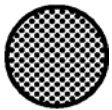

CU/AL Cables stranded
up to 750 sqmm at
max 62 mm Ø

CU/AL Cables sector type
up to 750 sqmm at
max 62 mm Ø

CU Cables flexible
up to 750 sqmm at
max 62 mm Ø

CU Cables flexible or cables
for telecommunications
max 62 mm Ø
