

London Electronics Limited

Bespoke Production Performance Systems

**How to
monitor
production
and improve
efficiency
on your
lines.**

Key benefits of the London Electronics system:

- Adjusted to your processes - nothing you don't need, everything you do.
- Near-Real-time data - so you and your team can react immediately
- Cloud-based - data available to all the team wherever they are.
- Expandable - designed to grow and adapt as you do.
- No limit on users, no annual license fees - affordable
- Modular - add features you want, remove those you don't.
- Automatic software updates - no need to download updates
- No software or app fees - Use on any web enabled device at no cost per device.
- SSL encrypted data - data cannot be read, if intercepted
- Scrambled stats - access data is scrambled to prevent unauthorised reading.
- Fast return on investment

What are line stoppage

How can our system help you?

It will allow you to.

- Monitor real time production
- Relay important information and events to relevant parties RIGHT NOW! This ensure that things happen when they should.
- Record production values to trend analyse and enable better planning and forecasting
- Empower your workforce
- Improve efficiencies with group inter competition
- Reduce wasted time of individuals manually entering / recording inaccurate data and allow shop floor teams to get on with production.
- Send dynamic information back to the line in near-real-time
- Collate performance information to calculate 'V' curves and simply show areas for improvement.
- Access data wherever you are, when you need it.
- Show Live dashboards to operators.
- Empower staff to make key decisions

Web Hosting – Complete license free flexibility

A cloud-based server allows rapid development and maintenance of the system. We use HTTPS for data transfer and password protect logins for ALL users.

You also have the added benefit of being able to view data whilst off-site, which might not be possible if you host the system on-site.

We handle all the database administration and web updates for you. You can directly source a hosting package from a preferred supplier with SSL certificate, or we can action this on your behalf for a small monthly fee (Typically £50.00 / month). SSL is £550.00 one off purchase. License Free
