

# ARGUS®

THE UNIVERSAL xDSL TESTERS FOR SERVICE TECHNICIANS

all in one device:

- Copper Tester\*
- POTS butt set
- POTS phone
- POTS monitor
- ISDN test set
- ISDN phone
- ADSL/VDSL2\* tester
- ADSL/VDSL2\* modem
- ADSL/VDSL2\* router
- VoIP tester
- VoIP phone
- PC replacement

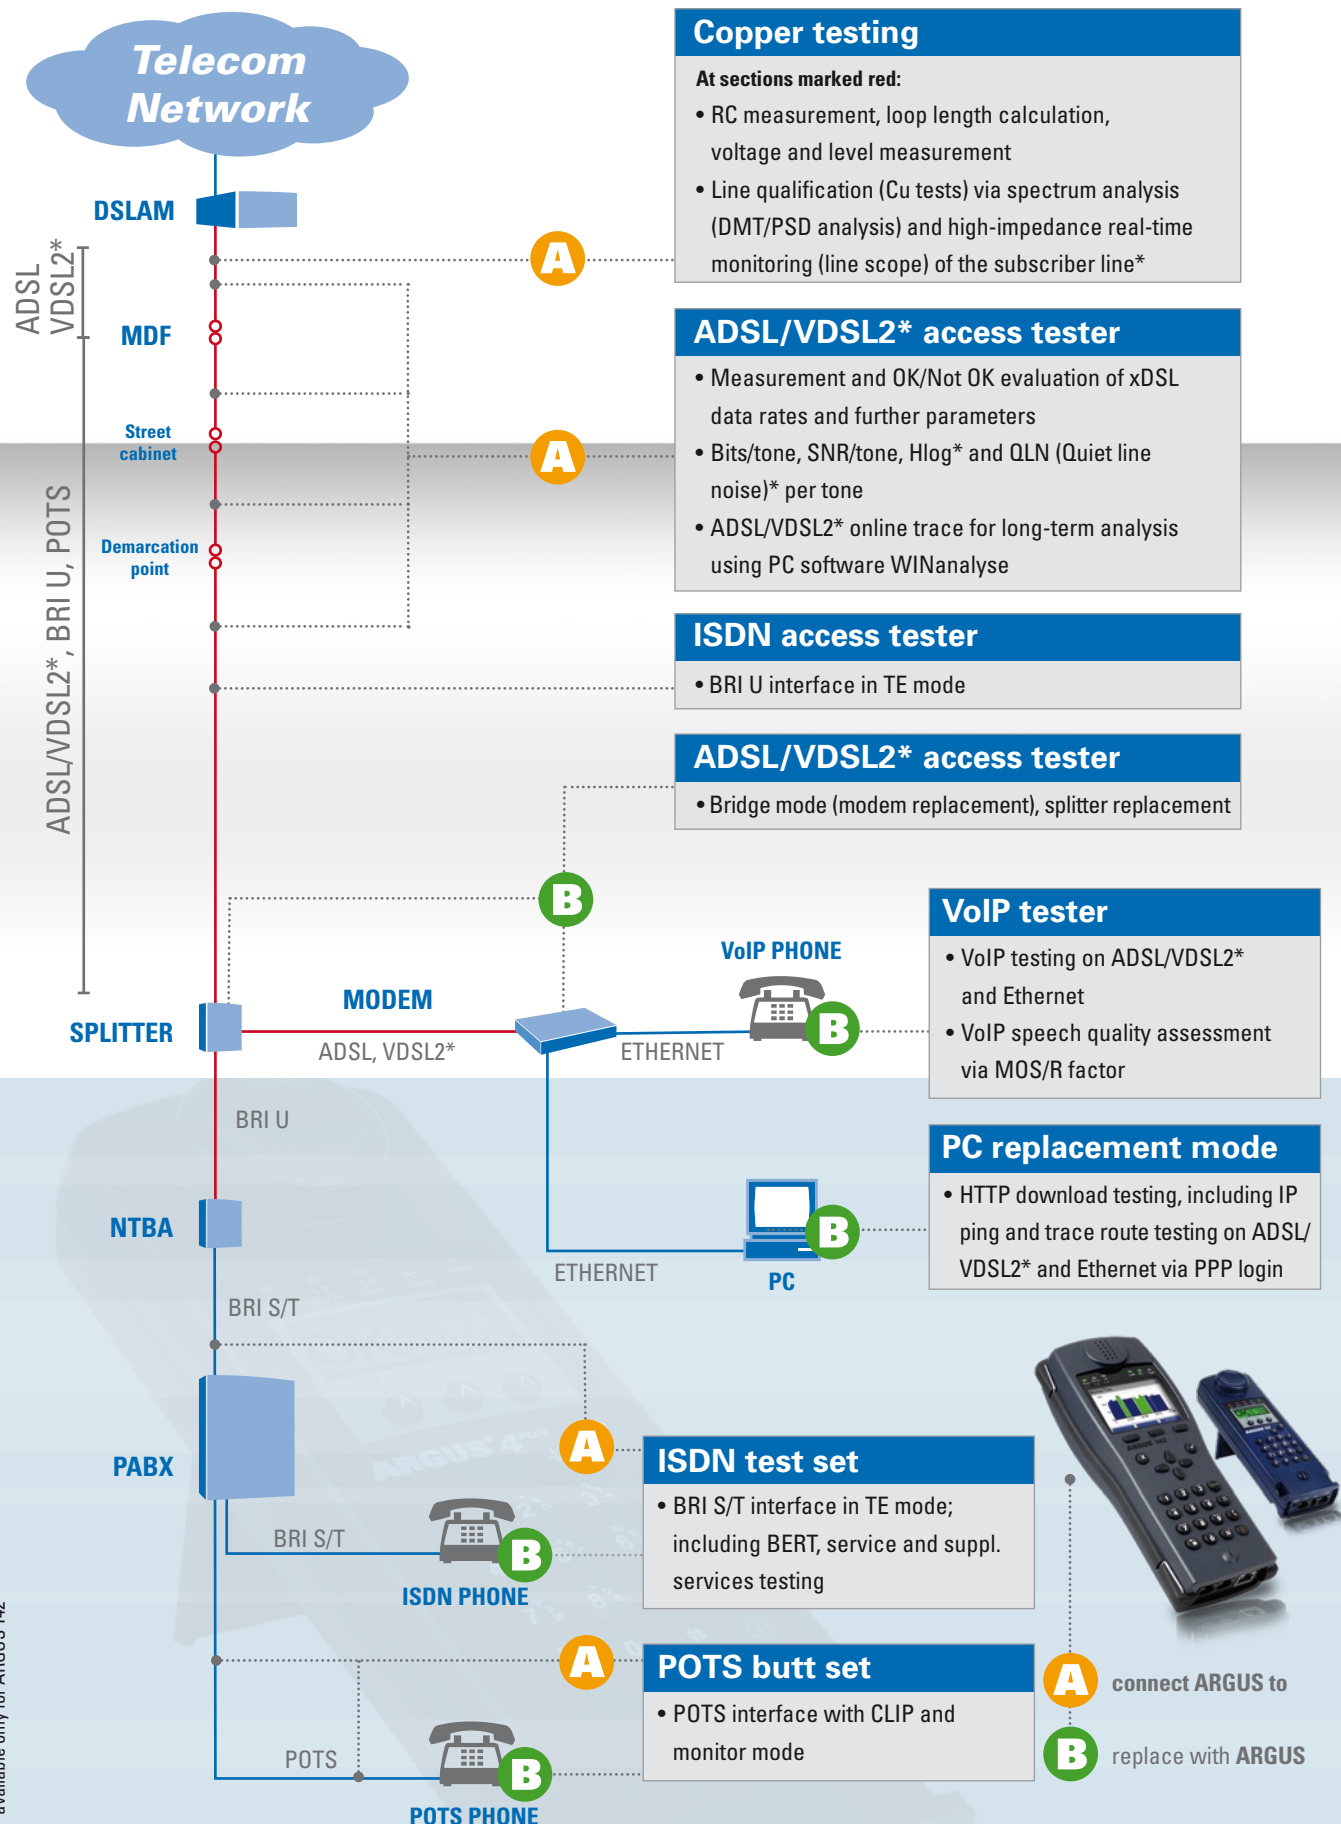

\* available only for ARGUS 142

GESELLSCHAFT FÜR  
INFORMATIONSTECHNIK mbH

# Where to test with ARGUS?

## Possible applications to qualify telecom networks using ARGUS test sets

# How to test with ARGUS?

## Comprehensive qualification of the local loop utilizing ARGUS test sets

1

### Copper (Cu) analysis

#### From DSLAM to splitter:

- RC measurement:
  - Resistance, capacitance
  - Tip towards ring, tip and ring towards ground

#### Measurements on local loop:

- Voltage measurement
- Line scope\* supports the interpretation of access type and pilot tones
- Spectrum analysis to detect xDSL signals, interferences and noise\*

2

### Synchronization

- **ADSL/VDSL2\***: Synchronization
- **ADSL/VDSL2\***: Evaluation of
  - Up- and downstream parameters
  - Line attenuation, SNR margin
  - Bits, SNR, Hlog, QLN per tone

- **ISDN**: Layer 1 setup:
  - Level measurement
  - Layer 1 state
- **POTS**: level, hook-on, hook-off

3

### Protocol setup

- **ADSL/VDSL2\***: PPP connection setup
- **PPP**: Authentication with:
  - User name
  - Password

- **PPP**: Display of PPP login trace
- **ISDN**: Access detection:
  - Point-to-Point, Point-to-Multipoint
  - Protocols (e.g. DSS1, CorNet, etc.)
  - Availability of B channels

4

### Protocol testing

- **IP**: Ping and trace route testing
- **IP**: Bridge and router modes
- **IP**: Ethernet link setup

- **ISDN**: Supplementary services testing:
  - Call forwardings, advice of charge
- **ISDN**: Services testing, e.g.:
  - Speech, telephony, facsimile, etc.

5

### Performance testing

- **ADSL/VDSL2\***: Online trace
- **IP**: HTTP download
- **IP**: FTP\* up-/download

- **ISDN**: bit error testing
  - As a loopbox
  - In end-to-end mode
  - Various bit patterns available

6

### Services testing

- **VoIP**: TE simulation
- **VoIP**: Quality of service (QoS) via:
  - MOS evaluation / R factor
  - OK/FAIL assessment

- **ISDN**: Call setup
  - End-to-end
  - Self call
- **POTS**: Call setup (CLIP)

# In use throughout Europe

intec Gesellschaft für Informationstechnik mbH is developing products for the international telecommunications market for more than 20 years and is one of the leading suppliers for xDSL, ISDN and IP measurement technology in Europe today.

With the aid of ARGUS measurement equipment, users can conveniently and safely commission and troubleshoot xDSL and ISDN accesses as well as inspect services like VoIP and IPTV based hereon. ARGUS testers are designed to meet the day-to-day needs of the field staff; consequently intec engineers focus on ensuring high-quality measurements combined with simply and convenient operation.

The portfolio of ARGUS testers, software and analyzers benefits from a continuous development and is kept up-to-date with support for the current standards for all the common access types and protocols as well as for the features of the Next Generation Networks (NGN) and Triple Play services. Throughout the world, numerous telecommunication companies have come to appreciate and rely on the advantages offered by intec equipment; to name just a few Deutsche Telekom, Saudi Telecom, Telefonica, KPN, British Telecom and Telekom Austria.
